info@intrepidconsult.com

INIS is a fully automated service that continuously collects industry news from a large number of sources (newsletters, RSS feeds, alerts...) and includes them in real time into a user-friendly database, easily accessible with a browser. INIS is provided by VERSUS MONITOR, a division of Intrepid Consult SL.

Subscribers see the headings in the original language of the entry and also translated into their own language. Although the translation is automated and therefore limited in their accuracy, it gives a first idea of the entry contents.

Clicking on the entry opens the original referral. If the link is to a subscription service, only the public domain information will be displayed, to avoid copyright infringements.

Entries are listed chronologically, last-in on top, by keyword or by specific date, at user's choice.

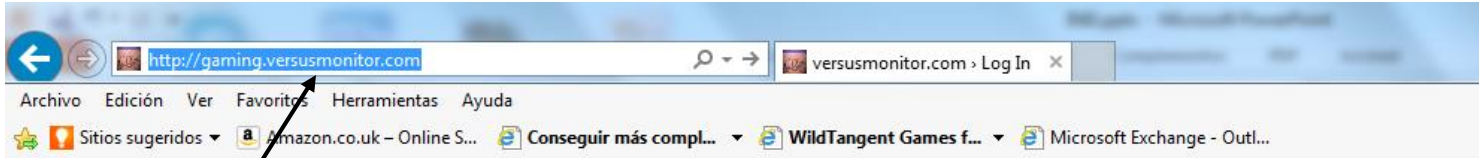

A daily newsletter is sent every night (at 23.59 CET) to the subscribers, listing all the headings recorded on the day.

DISCLAIMER

INIS is a service provided to the subscriber on a "as is" basis. Intrepid Consult cannot guarantee the accuracy of the listed entries, their time stamps or their contents.

The complete listing of news sources is provided to subscribers on a confidential basis.

If a subscriber asks for an additional public domain source be included in the system, Intrepid Consult will do its best efforts to that end. The news from the additional source will be available to all subscribers.
